	Frog Leg											<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	

REAR SEAT HEIGHT SELECTION - in dependance of rear wheel size

The rear seat height is adjustable ± 10 mm.

The rear seat height can only be between 0 mm and 110 mm below the selected front seat height.

Caution: with rear seat heights 460 mm and above, the width between the sideguards increases by 35 mm

Rear seat height in mm

Rear Wheels	380	390	400	410	420	430	440	450	460	470	480	490	500

Comments for special build:**Krypton R - Base Price****£3,745****Option price****Total Price**

(1) only with KRR070203, handrim aluminium, powder coated

(3) No choice possible when frame graphics "Flying Pixel" are chosen.

(4) Anodised colours for hub and rim, black spokes. Only with light weight wheel in 24"

WEIGHT

We want to be very transparent on weight. The following information will be a guide to the lightest possible Krypton R: how to achieve a 6.2 kg wheelchair, and how to order the lightest possible configuration for your Krypton R

Krypton R: 6.2 kg configuration Transport weight: 3.7 kg

Frame: high frame, 92°, 30 mm inset, seat width: 360 mm, seat depth: 400 mm. Seat height: front 470 mm, rear 420 mm. Seat-sling Airflow superlight.

Wheel-lock : lightweight compact wheel-lock

Footrest: tubular footrest

Backrest: Carbon backrest, EXO superlight backrest-upholstery, without push-handles

Sideguards: Carbon fibre, slim-style

Rear wheels: 24" Proton wheels with Aluminium handrims (coated or anodized) and Schwalbe One tyres

Forks and castors: 111 mm carbotechnology fork, 3" castor

Please mind that there is a 5% tolerance on all weight specifications due to weight deviations on mounting parts (tyres, castor-wheels etc.)

LIGHTWEIGHT-GUIDE FOR ORDERING THE KRYPTON R

Sunrise Medical offers a wide variety of options for the Krypton R to suit every user's needs. However, most options add significant weight to the wheelchair. To make this more transparent when filling in the order-form, and to assist you in ordering the lightest possible wheelchair, we indicate the approximate weight-increase of the options on the order form:

- (L)** indicates the lightest possible option within the range of options
- (+)** indicates that this option adds more than 500 g to the wheelchair's weight compared to the lightest option within the range

LIGHTWEIGHT OPTIONS FOR THE KRYPTON R

We developed several options for the Krypton R to save weight on the chair without sacrificing daily-use suitability, comfort or durability

Carbon backrest (KRR030006): full carbon backrest with very close cross-tube (20mm cross-tube to backrest-upholstery) (-100 g compared to Standard backrest)

Seat sling "airflow" superlight (KRR020019): fully adjustable seat-sling with composite buckles and lighter straps (max. user weight 85 kg) (-100 g compared to seat sling "airflow")

EXO superlight (KRR030005): lightweight version of the EXO backrest upholstery. EVA-foam padding, adjustable straps, wider cut of the upholstery to cover backrest tubes. (-160 g compared to Std. EXO backrest-upholstery)

Axle-plug superlight (KRR070049): (only 0° camber): glued into the axle-tube, no adjustability of the track-width possible (-160 g compared to width-adjustable axle-plug KRR070600 / 603)

Please follow this measuring method:

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

Seat width (SW):

- a) *For the user:* Allow space between sideguard and hip on each side of the chair (approx. 10 - 20 mm altogether)
- b) *On the wheelchair:* From outside frame tube to outside frame tube.

Seat depth (SD):

- a) *For the user:* When sitting upright: leave space for 2 - 3 fingers between front edge of the seat upholstery and back of knee (approx. 30 - 60 mm). Care must be taken with adj. upholstery.
- b) *On the wheelchair:* From back tube to front of seat upholstery.

Front seat height:

- a) *For the user:* When sitting with 90° knee angle: From back of knee to bottom of shoe sole.
- b) *On the wheelchair:* From front of seat tube to the ground. (min. 30 mm longer than user measurement) Remember to include the cushion height.

Rear seat height:

- b) *On the wheelchair:* From back of seat tube to the ground.
Note: Max. seat height difference rear to front is 130 mm

Back height:

- a) *For the user:* From the seat, including cushion, to be no more than 10 - 20 mm below the lower shoulder blade.
- b) *On the wheelchair:* From back of seat tube to upper edge of backrest upholstery.
Note: The user's ability to sit upright has a major influence on the back height and it can therefore differ considerably

Back angle:

Important: The back height depends on the degree of disability. 0° is the angle 90° to the seat. Negative angles are <90° and positive angles are >90°.

Low Seat Frame vs. High Seat Frame:

The high frame is 40 mm higher than the low frame. So you can choose shorter and lighter forks to minimise the weight of your wheelchair.

Technical Data Overview:

Max. overall height:	950 mm	Max. overall width:	Camber	24" rear wheel	25" rear wheel
Max. overall length:	930 mm		For 0° camber:	SW + 170 mm	SW + 170 mm
Max. turning circle:	700 mm		For 3° camber:	SW + 230 mm	SW + 240 mm
Max. safe slope:	7°				
Wheelchair weight:	from 6.2 kg				
Dismantled weight:	from 3.7 kg				
Weight of heaviest part:	2.1 kg				

All changes in the configuration might change the seat heights.
Manufacturing tolerances are +/- 10 mm for all measurements.
